# Bi-Directional Integration of Microsoft Project Online and Microsoft Planner

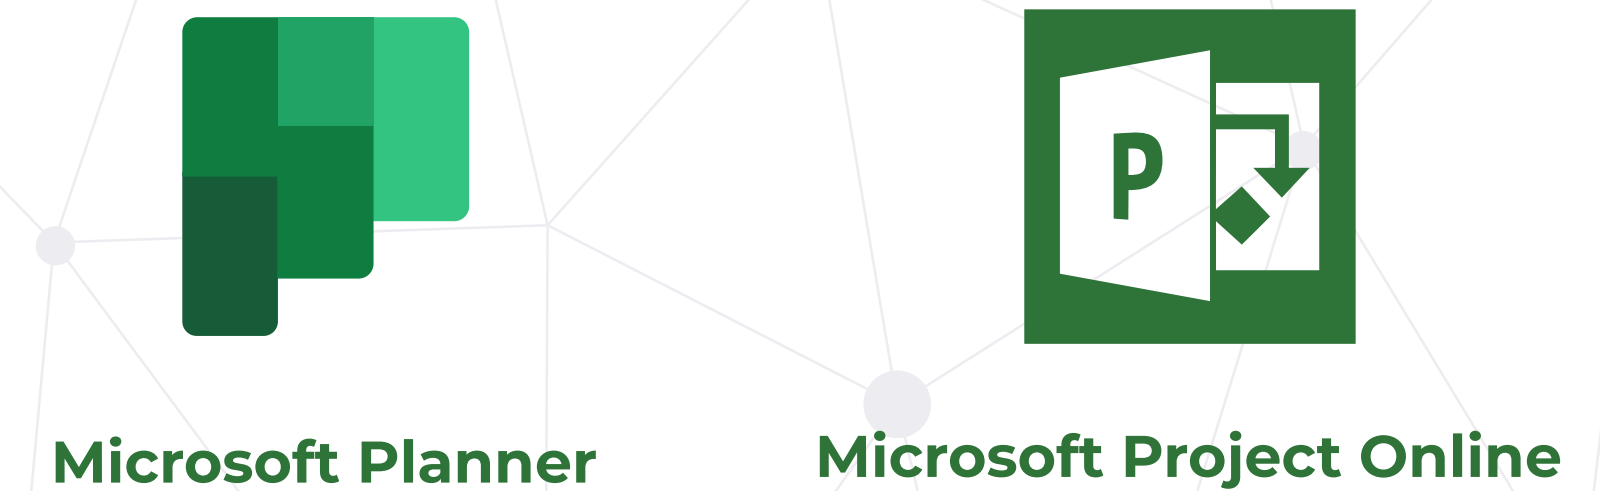

Businesses need to integrate data resting on Project Online and Planner.

Learn more about bi-directional integration ways with FluentPro Integration Hub.

# What Challenges Occur While Working in Project Online and Planner at a Time

PMO directors and PPM administrators want to get tools that bring sense to their projects. Microsoft Planner and Microsoft Project Online are the two very different products that help achieve this. Despite their differences, they serve the same purpose – teamwork and collaboration.

As good as these project management tools are, their integration is a significant setback. Microsoft Project Online and Microsoft Planner carries very limited integration opportunities. You cannot start work in Project Online and complete it in Planner.

# With Integration Hub, you have flexibility on how you would like the tool deployed – on-premises or cloud-based.

**On-premises.** Organizations with strict security and preferring to explore the benefits of on-prem infrastructure can have it installed on their end.

**Cloud-based.** To avoid setbacks of maintenance, organizations can go with the online version hosted on secure FluentPro Microsoft Azure Infrastructure.

# Key Features of Integration Hub

Integration Hub helps organizations benefit from Microsoft Project Online and Planner greatly:

**Uni-and-bi-directional integration.** The tool carries one-way or two-way integration. Bi-direction option empowers to start and stop work from any platform without sensing any discrepancies.

**On-premises and cloud-based installation.** Integration Hub does not limit how you want to set it up. You can install it on the internal infrastructure or secure cloud servers.

**Extensive data transfer rules.** Integration Hub offers secure and swift data transfer, allows to configure extensive rules of how data moves in your company impacting competitive advantage.

**Quick configuration.** Configuring Integration Hub takes place relatively fast for a tool of its purpose. It would help if you approximately had it up ready.
