

FluentPro Governance and Administration Suite with backup restore and recovery

B.Braun relies on FluentPro for confident Project
Online backup and data protection

PROJECT BACKGROUND

B.Braun SE is one of the world's leading providers and manufacturers of healthcare solutions today. As well as manufacturing and supplying 5,000 product lines, the company offers supplementary and consultancy services to help find the best solution for patients.

Effective management of the development, production and QA of such a wide array of solutions relies on the veracity of the information gathered in its storage systems. As new users of Project Online, B.Braun chose FluentPro G.A. Suite to deliver the backup restore and disaster recovery necessary to protect company interests.

PROJECT DESCRIPTION

As new Project Online users, there was an increased risk of data loss. The accidental deletion of project files, for example, would cause a high level of damage to the company.

B.Braun decided to take a conservative approach – backing up their PWA environment as much as possible. The company's environment comprised four PWAs (production, QA, development and sandbox/training), around 3,000 subprojects, projects and programmes and 400 portfolios. With so much complexity, this was time-consuming work. Heavily reliant on manual processes, it carried an increased risk of errors.

SOLUTION DELIVERED

FluentPro G.A. Suite combines configuration management, migration, and data management tasks with the possibility to backup and restore Project Online configuration, data, and SharePoint content. The easy-to-use platform allows the team at B.Braun to perform full or partial backups – by schedule or on-demand – creating multiple backup plans and restoring as needed. Users are most impressed with the confident data backup, restoration and archival it offers via an automated toolset for backup and disaster recovery.

Implementing FluentPro G.A. Suite was straightforward, thanks to the proven process supporting it and guidance from the FluentPro team. After copying the PWA environment, FluentPro helped B.Braun to visualize the topology of services operating within it. This provided the client with a greater understanding its complexities.

PWA configurations were documented ahead of FluentPro team backing up and restoring projects, PWA configuration. Following this success, FluentPro supported B.Braun by deploying and moving configuration changes to the company's Microsoft Project Online PWA.

VALUES DELIVERED

All of B. Braun's goals were met with FluentPro G.A. Suite, including the following benefits:

- Automated daily (incremental) and weekly (full) backup for absolute data protection and safety.
- Less manual work reduces cost and time involved; it produces less errors, too.
- Reduction of data loss risks.
- Easier management of master data parameters with copy and data management features.
- 1 to 4 cost savings achieved.

ABOUT FLUENTPRO SOFTWARE CORPORATION

FluentPro Software helps organizations simplify and automate migration, implementation, configuration management, data protection and Microsoft PPM solution integrations. Established in 2010, FluentPro software is used to effectively manage Microsoft PPM Platform solutions (Microsoft Project Online, Microsoft Project Server, and Power Platform).

FluentPro works with some of the world's largest organizations, including Goodyear, Abbott and NBC Universal. A Microsoft Partner in PPM, FluentPro has worked on multiple complex global implementations building sophisticated integration to external financial systems.

The business offers solutions for migration, disaster recovery/backup, configuration management, implementation, administration, business intelligence, and report development.

A US-based corporation headquartered in Redmond, Washington, FluentPro employs a team of more than 60 experts to ensure it delivers innovative, high-quality solutions that generate the best results.

"We like FluentPro! The application and the great support is much appreciated."

"G.A. Suite saves us a lot of manual work. Just entering information once on the productive site and then transferring saves costs, time and nerves. Plus, it produces less errors."

"If something goes wrong for any reason, you just go back to FluentPro and restore from yesterday and many of our customers are happy to have this possibility."
