FluentPro Governance and Administration Suite with backup restore and recovery

With FluentPro's Project Online backup and disaster recovery capabilities, Cardo Systems increases Microsoft Project Online stability

fluentpro

PROJECT BACKGROUND

Cardo Systems has one mission: to make its customers' motorcycle rides exceptional.

The company's world-first communication systems bring advanced Bluetooth and wind-suppressing technologies within a sturdy, waterproof shell. When attached to a helmet, it allows riders to connect with their music, their phones, and (most importantly) each other.

PROJECT DESCRIPTION

Research and development underpin the company's position as a leader in the field. To ensure the integrity of the company's two PWAs, Cardo System relies on the impressive backup and disaster recovery capabilities offered by FluentPro G.A. Suite.

Cardo Systems operates two PWAs. While one is production, the other is utilized as a test environment – allowing for live projects to undergo simulation and testing.

Many stakeholders within the organization have full access to the company's projects – increasing the risk of data corruption and loss. At any given time, Cardo Systems runs around 20 projects.

CHALLENGES AND CHALLENGES FACED

Cardo Systems approached FluentPro looking for greater confidence in the stability of its systems and the critical information at its core. A loss of its Gantt plans, for example, would create a significant crisis for the company.

With such a high risk of data corruption, the client needed a reliable way of ensuring the automatic backup of data, supported by a retention policy that provides several months of backups to prevent the risk of data being lost or corrupted.

Notably, the client wanted the ability to do this and recover files without introducing the complexities of involving Microsoft or IT professionals.

SOLUTION DELIVERED

FluentPro G.A. Suite provides Cardo Systems with the user-friendly backup and disaster recovery capabilities needed to ensure the organization's data integrity. The easy-to-use software means that when issues arise now, these can be resolved easily and quickly in-house - without a need to relay the problem to Microsoft or the IT team. FluentPro G.A. Suite automatically generates a job ticket to ensure administrators are aware of issues while suggesting solutions. Notably, the system tracks the problem until the client confirms it is entirely solved – ensuring nothing "falls through the cracks".

FluentPro G.A. Suite allows Cardo Systems to configure publishing and backups to meet their needs. Scheduled to publish all projects daily, the system is configured to run an incremental backup and copy once a week and a full backup once monthly.

Since introducing the software, a few occasions have required Cardo Systems to restore projects to the last valid version. FluentPro G.A. Suite allows administrators to manage this directly – without any need to contact IT professionals.

Cardo Systems is particularly impressed with the software's copy and data management feature. Once a week, the team utilizes this feature to confidently copy all projects to its test environment – ensuring simulations run on the latest and most updated files.

REALIZED BENEFITS

All of Cardo System's goals were met with FluentPro G.A. Suite, including the following benefits:

- ✔ Easy, in-house management of PWA environments.

- ✔ Quick recovery in-house without the need for additional support.

- ✔ Reliable incremental and full data backup.

- ✔ Reduced data loss risks.

- ✔ Increased confidence in system stability.

- ✔ Proactive problem tracking.

ABOUT FLUENTPRO SOFTWARE CORPORATION

FluentPro Software helps organizations simplify and automate migration, implementation, configuration management, data protection and Microsoft PPM solution integrations.

Established in 2010, FluentPro's software is used to effectively manage Microsoft PPM Platform solutions (Microsoft Project Online, Microsoft Project Server, and Power Platform).

FluentPro works with some of the world's largest organizations, including Goodyear, Abbott and NBC Universal. A Microsoft Partner in PPM, FluentPro has worked on multiple complex global implementations building sophisticated integration to external financial systems.

The business offers solutions for migration, disaster recovery/backup, configuration management, implementation, administration, business intelligence, and report development.

A US-based corporation headquartered in Redmond, Washington, FluentPro employs a team of more than 60 to ensure it delivers innovative, high-quality solutions that generate the best results.

"

In our organization, many stakeholders have full access to our projects. The fact that everything is back up and that retention policy keeps everything for a few months gives us confidence that no major crisis can happen.

As the system is very user-friendly, I have independency in file recovery – without the need to relay to an IT team and more complex backups.

Your support team is one of the best I've ever worked with! Great attitude, lots of patience, and great knowledge.

IDAN BAR-ASHER
Project Manager
Cardo Systems

Fluent Books

Helps PWA administrators and consultants with migration and configuration management activities in Microsoft Project Online and Project Server.

Backup
by fluentpro

Cloud-based platform providing automated continuous backup and restore for project management systems like Microsoft Project for the Web, Monday.com, Office 365 Planner, and other.

G.A.Suite

Provides tools to backup/restore/archive data, manage Microsoft Project Online configuration lifecycle, and implement governance policies.

project migrator

Provides an automatic migration between project management systems like Project Online, Monday.com, Trello, Asana, Office 365 Planner and Project for the Web.

IntegrationHub

Integrates Microsoft Project Online and third-party agile platforms, such as JIRA Software, Azure DevOps, Microsoft Office 365 Planner, and ServiceNow.

DataMart

Provides organizations with the advanced business intelligence, analytics, executive reporting, trend analysis, and data visualization they need to make data-driven decisions.
