

Quick Start Guide for Microsoft Project Online

Fully managed deployment and fine-tuned configuration
performed in a few days

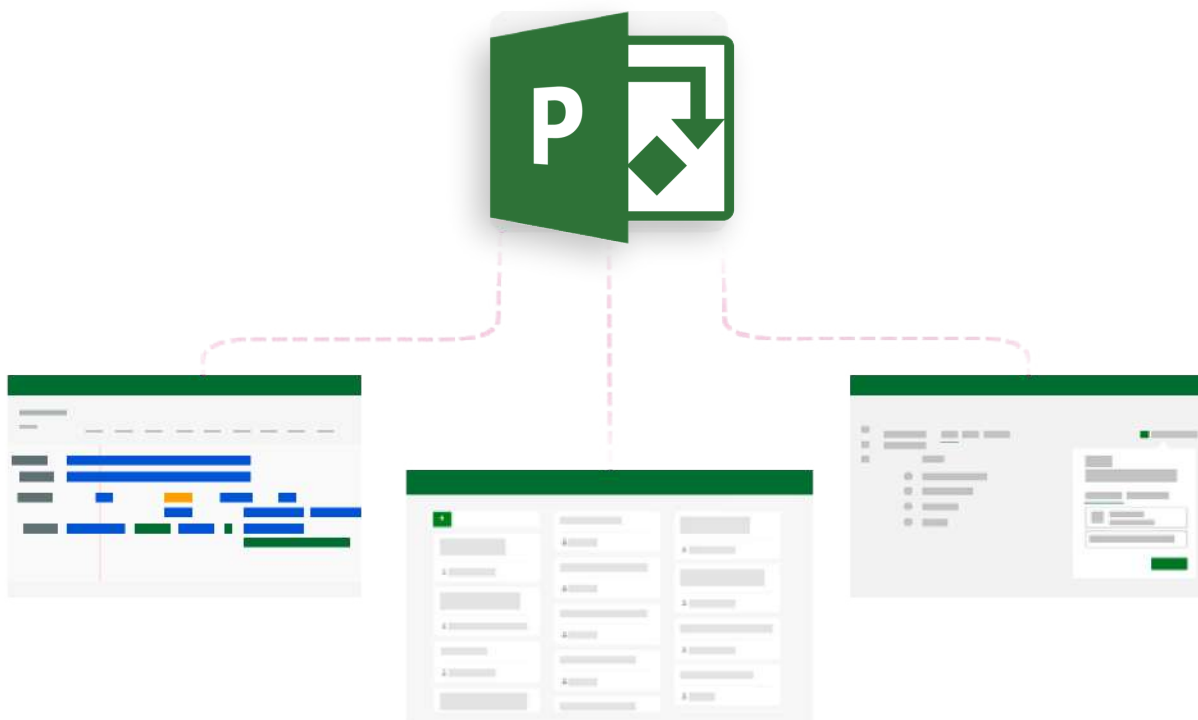

fluentpro

Why deployment is a challenge

Microsoft Project Online is a complicated project management software. It requires setting up the environment and configurations for efficient use. So, when deciding to use Project Online, organizations can face multiple challenges.

- Deployment is complex and inefficient.
- Project Online configuration is time-consuming.
- No proper user onboarding.
- No support from IT specialists.
- No integration with other systems.

QuickStart Project Online Implementation

FluentPro Team will deploy and implement to your PWA a ready-made industry-proven Microsoft Project Online configuration based on best practices in 1 to 3 business days instead of weeks using our automation software tools.

Start with Microsoft Project Online

FluentPro has helped organizations simplify Microsoft PPM solutions usage for over a decade. [FluentPro Team](#) provides quick deployment and configuration for Project Online with deep knowledge of platform limitations and specifics. We get your PWA up and running for you. After software implementation, organizations get user onboarding training and full support while using.
