FluentBooks: Alternatives

Besides FluentBooks, several other options offer similar features for MS Project Online migration, MS Project Server migration, and migrating SharePoint site to another site. These include ShareGate, ProjectSolution, The Project Group (TPG), and CollabIT.

Let's look at how these alternatives stack up against one another.

Alternative #1: Project Migrator

Project Migrator is an advanced platform providing automated migration between project management systems. Using this solution, you can migrate from Microsoft Project Online to Project for the Web quickly and effortlessly. In addition, Project Migrator features migration between other systems:

- Monday.com → Microsoft Planner
- Microsoft Planner → Monday.com
- Microsoft Planner → Microsoft Planner
- Trello → Microsoft Planner
- Microsoft Planner → Project for the Web
- Project for the Web → Microsoft Planner
- Project Online → Project for the Web
- Asana → Microsoft Planner
- Asana → Microsoft Project for the Web
- Monday.com → Microsoft Project for the Web
- Microsoft Project for the Web → Microsoft Project for the Web

With full process automation, this cloud-based platform saves significant time, eliminates data loss risks, and completes migration in 4 simple steps:

1. Linking source and target systems.
2. Choosing all or certain project data for migration.
3. Data mapping between systems.
4. Launching the migration.

Project Migrator is secure, fully automated, and very simple to use. Get more information on how it works.

Alternative #2: ShareGate

ShareGate is a Microsoft 365 management software that aims to help IT professionals with MS Teams, SharePoint, Office 365 optimization, and migration.

ShareGate offers plenty of valuable features.

- SharePoint and Teams migration with no data limit.
- Built-in and custom reports, including usage statistics and any issues that need to be addressed.
- Use automated workflows to help manage and govern your tenant without using PowerShell.
- The Teams chatbot from ShareGate automates interactions with owners to collect missing data on your behalf.
- Granular visibility and permissions control guarantee that the appropriate individuals have the proper access and protect sensitive data.
- Besides SharePoint, ShareGate also helps with MS Teams migration.

ShareGate has a steep learning curve and comparatively lower intuitiveness than competitors. Moreover, it is plagued by longer migration times.

Alternative #3: ProjectSolution

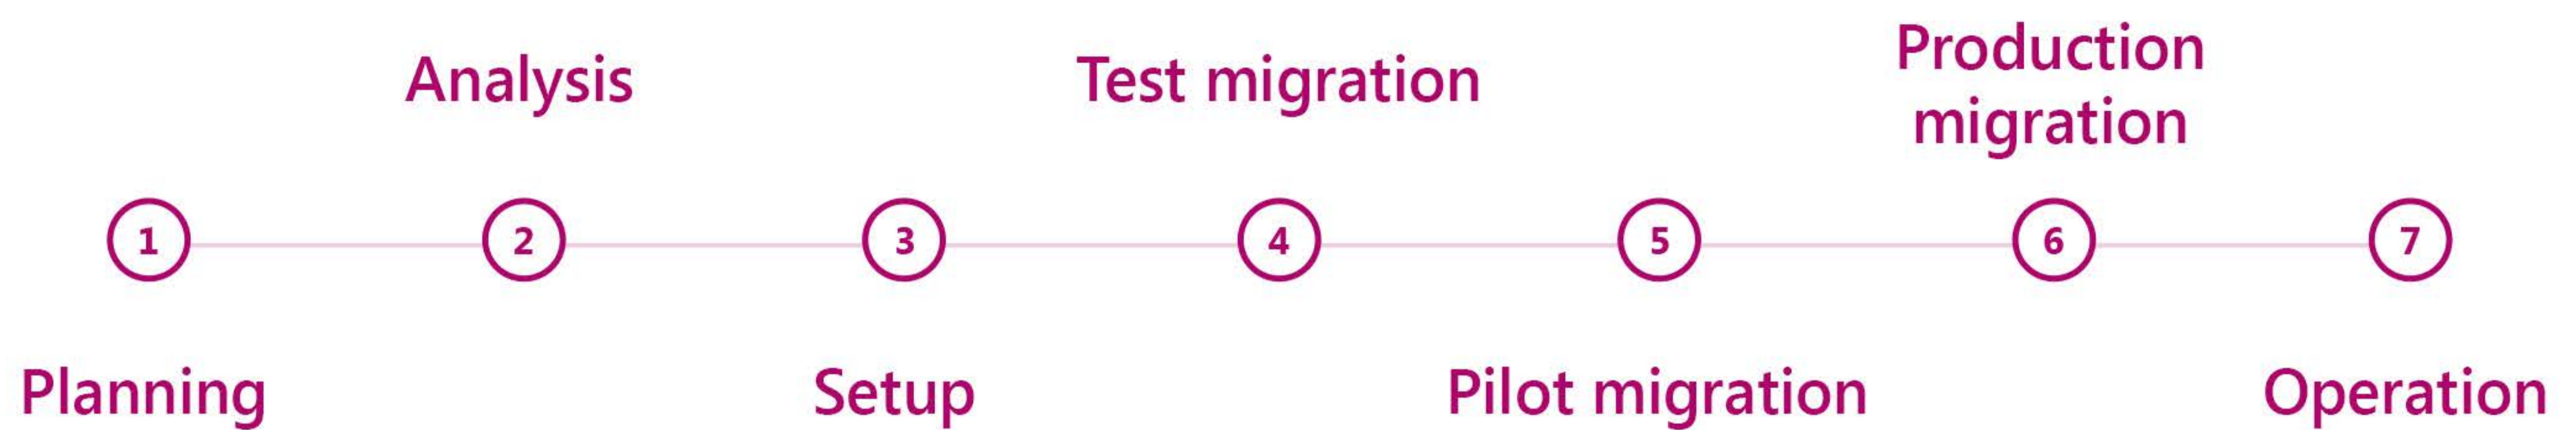

With over 15 years of experience, ProjectSolution offers different technical support packages to serve an organization's project management and administration needs. ProjectSolution helps with migration, templates, resource data, attribute mappings, and complete server configuration from Project Server to Project Online.

You can also get help with migration for SharePoint, MS Project Server, and Project Online and get training and consultancy services from ProjectSolution.

Alternative #4: The Project Group

The Project Group or TPG is a global IT solution and consulting services provider with over 20 years of experience. TPG provides migration between Microsoft Project Server versions or helps migrate Project Server to Project Online.

It completes the migration process in 7 phases:

TPG guarantees data quality and the most efficient migration completion with a structured implementation process in mind.

Alternative #5: CollabIT

CollabIT is another SaaS platform that offers SharePoint development and consulting, Microsoft 365 solutions, MS Project Server tool implementation, etc. It provides upgrade between different versions of Microsoft Project Server. Version changes, data & functionality migration are available at CollabIT.
