

# DataMart accelerates Project Online reporting

Transport For London (TfL) chooses FluentPro to drive project reporting efficiency and effectiveness

## PROJECT BACKGROUND

Transport for London (TfL) manages one of the world's most recognizable transportation networks.

It's also one of the most pioneering. As well as developing the world's first underground network, the company has responsibility for multiple rail networks, London's buses, taxis, trams, principal road routes, river services, and cycling provision.

## PROJECT DESCRIPTION

TfL uses Microsoft Project Online for less complex and large projects within business units within technology, operations, and organizational change in human resources.

More than 4,500 projects are stored within TfL's three separate PWA environments.

Project reporting and data analysis are essential aspects of a company's productivity and efficiency. Detailed reports help enhance the decision-making process, project effectiveness, and reach business goals faster.

## CHALLENGES AND CHALLENGES FACED

Business Intelligence (BI) assessments help organizations like TfL to drive value, reduce costs and risks within their operations.

While they have the potential to highlight ways businesses can work more efficiently, without the right tools to manage reporting, BI executives and PMOs face several challenges.

TfL wanted to expand and enhance reporting capabilities to overcome limitations. The company needed a single source repository for reporting purposes that centralized all the PWA and project sites associated with list data.

## SOLUTION DELIVERED

FluentPro recommended DataMart, its advanced platform that equips organizations with the advanced BI, analytics, executive reporting, trend analysis, and data visualization needed for reliable, data-driven decision-making.

Since introducing DataMart, the team at TfL regularly utilizes the platform's capabilities to enhance its reporting performance.

For example, the team makes the most of DataMart's interface for Power BI. FluentPro DataMart pulls the data on a custom defined schedule allowing to quickly access projects, tasks, resources, risks, and issues for reporting.

However, it's more than the speed that has impressed PMOs and Executives at PMO, according to a TfL representative.

"Using the DataMart contributes to improving project reporting and decision making, which improves efficiency and effectiveness as well as reducing risk."

While the representative describes FluentPro DataMart as "good value for money", he also values the professionals supporting its use.

He recalls: "When we have raised issues via the portal's chat facility, we have always found the agents extremely responsive and helpful."

## VALUES DELIVERED

Partnering with FluentPro has enabled TfL to meet its organization's project reporting goals - unlocking benefits including:

- ✓ Increased accuracy
- ✓ Accelerated effectiveness
- ✓ Improved project reporting
- ✓ Greater efficiency
- ✓ Reduced risk
- ✓ Improved decision making

## ABOUT FLUENTPRO SOFTWARE CORPORATION

FluentPro Software helps organizations simplify and automate migration, implementation, configuration management, data protection, and Microsoft PPM solution integrations.

Established in 2010, FluentPro software is used to effectively manage Microsoft PPM Platform solutions (Microsoft Project Online, Microsoft Project Server, and Power Platform).

FluentPro works with some of the world's largest organizations, including Goodyear, Abbott, and NBC Universal. A Microsoft Partner in PPM, FluentPro has worked on multiple complex global implementations building sophisticated integration to external financial systems.

The business offers solutions for migration, disaster recovery/backup, configuration management, implementation, administration, business intelligence, and report development.

A US-based corporation headquartered in Redmond, Washington, FluentPro employs a team of more than 60 to ensure it delivers innovative, high-quality solutions that generate the best results.

*FluentPro DataMart is good value for money.*

*We have always found the agents extremely responsive and helpful.*

*FluentPro are very customer-centric and deliver products that accelerate project effectiveness.*

## TRANSPORT FOR LONDON

## Fluent Books

Helps PWA administrators and consultants with migration and configuration management activities in Microsoft Project Online and Project Server.

### G.A.Suite

Provides tools to backup/restore/archive data, manage Microsoft Project Online configuration lifecycle, and implement governance policies.
