# FluentPro G.A. Suite for Project Online Governance

**fluentpro**  
FLUENTPRO.COM

To stay in sync with the fast-changing business world, organizations see the need to alter internal processes and strategies, such as corporate IT infrastructure and environments, including project portfolio management (PPM) software.

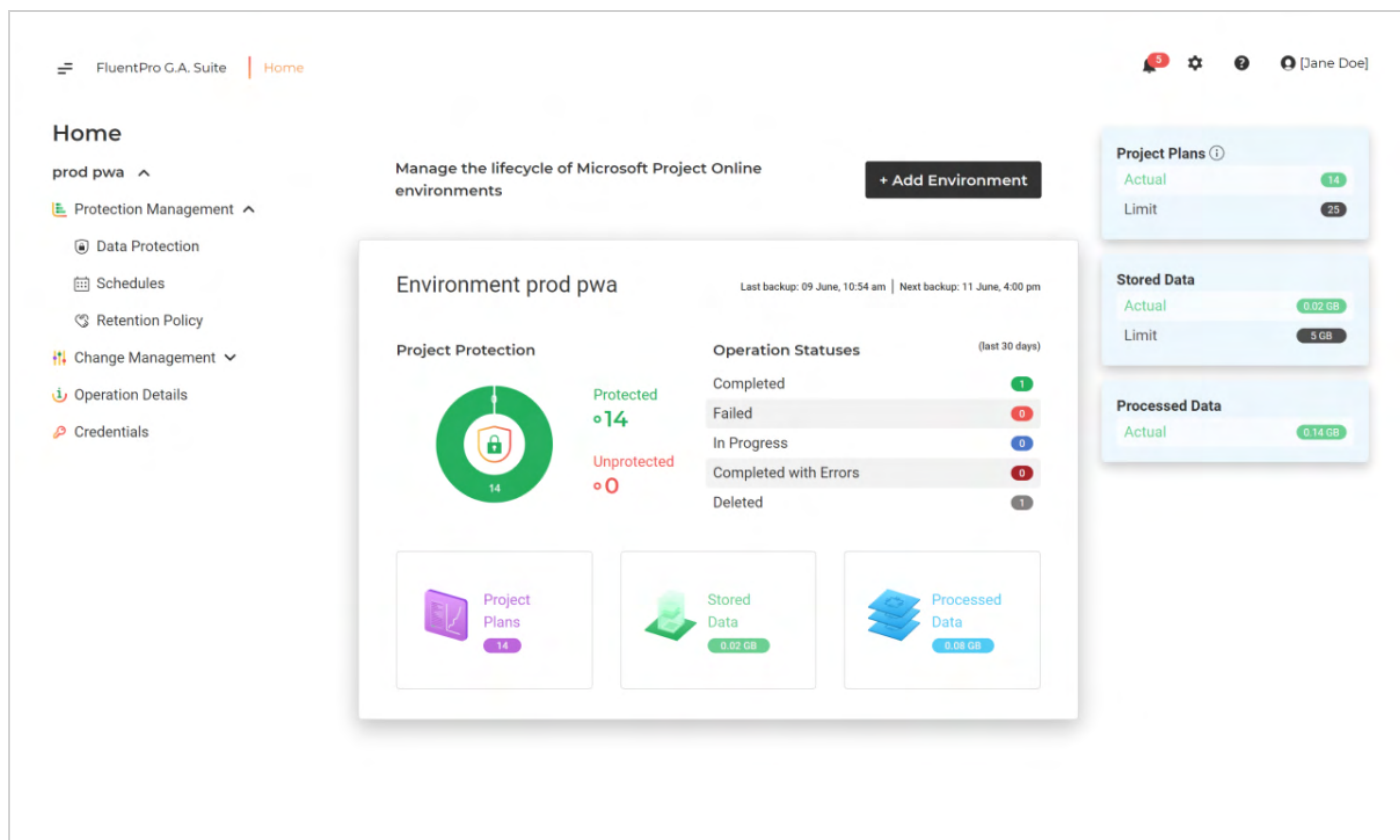

However, change management and environment management practices often result in high costs and significant time spent. The main reason is that change cycles and data management are performed manually, slowing down the process and causing errors.

Additionally, companies often lack ITSM best practices and understand how they can be applied to a company's processes and needs.

## Managing Microsoft Project Online Environments Made Easy

FluentPro Governance and Administration Suite (G.A. Suite) is a SAAS platform created for companies that use Microsoft Office 365 Project Online.

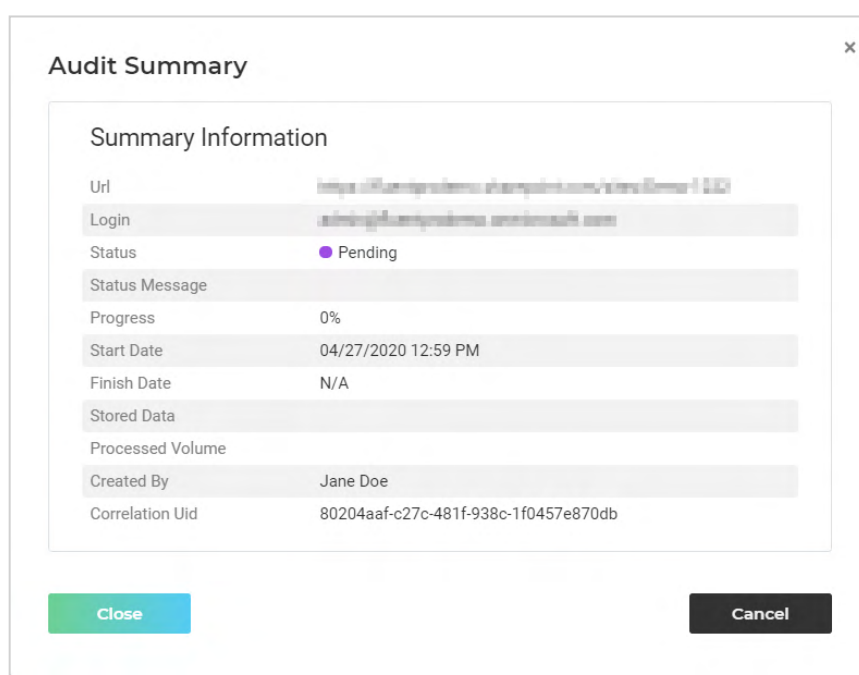

FluentPro G.A. Suite provides a complete, easy-to-use toolset to help PMOs manage the lifecycle of Microsoft Project Online environments and governance for Microsoft Office 365 PPM.

## Solution

FluentPro Governance and Administration Suite is designed to help companies establish practices for Office 365 Project Online in compliance with ITSM.

FluentPro G.A. Suite provides usage and adoption analytics and governance capabilities for decision-makers and PMOs.

The critical capability is configuration change management and governance. The platform allows users to:

- ✓ Copy PWA environments
- ✓ Visualize services topology
- ✓ Audit PWA configurations
- ✓ Document PWA configurations
- ✓ Archive data
- ✓ Backup and restore projects, configurations, and SharePoint content
- ✓ Deploy and move configuration changes to Project Online PWA

FluentPro G.A. Suite also gives valuable insights into whether your PWA environment corresponds to industry best practices.

Project	State	Start Date	Finish Date	% Complete	Last Date of Backup	Number of Backups	Last Modified Date	Link to view details
Biothermal Ear Warming System	Non-Active	01/08/2018	02/01/2019	69		0	04/05/2019 03:07:41 PM	
Document Approval	Non-Active	08/15/2017	08/16/2017	35		0	04/05/2019 03:07:31 PM	
Geothermal Sensor for Aerial Surveillance	Active	01/22/2018	05/27/2019	50		0	04/17/2019 11:21:30 AM	
Integration Hub Project	Non-Active	04/03/2017	05/24/2017	12		0	07/06/2017 03:10:38 PM	

FluentPro Governance and Administration Suite automates configuration management processes, reducing manual work and eliminating most human errors.

When you employ FluentPro G.A. Suite, environment management becomes faster, best practices are delivered in real-time, and your organization will enjoy lower operating costs and better results.

## Benefits of Using FluentPro G.A. Suite

FluentPro G.A. Suite brings numerous benefits to enterprises:

- ✓ **ITSM Compliance**

Enhances project management processes by establishing ITSM-compliant best practices in your organization.

- ✓ **Risk Mitigation**

A complete automated toolset for backup and disaster recovery provided by FluentPro G.A. Suite is the only solution to make your company risk-resistant against any data loss.

- ✓ **Efficiency & Optimization**

Reduces time and resources spent on PWA administration, eliminates error factors and related costs, and improves how you administrate and use Microsoft Project Online.

- ✓ **Actionable Insights**

Decision-makers will access deeper insights about PWA usage, adoption, and excellent governance capabilities for the organization's executives and PMOs.

# Why Choose FluentPro?
