One of the critical components of successful project delivery is ensuring that your projects are visible to all relevant stakeholders. This means ensuring everyone can access the latest project information and that the data is presented clearly and understandably.

However, managing multiple project management systems can influence visibility badly and cause the following challenges:

No single view capabilities.

Disparate project management platforms.

Balancing different methodologies within a single project can be complex.

No consolidated view.

Limited reporting functionalities.

Fragmented reporting.

Missing features and capabilities.

Ensuring that projects adhere to the strategy over time.

Managing resource allocation across different projects and tools.

Ensuring that innovative ideas are effectively integrated into project planning and execution.

Managing and processing vast amounts of data in a scalable and cost-effective manner.

If you're struggling to get on the right path or reach your project portfolio visibility goals, FluentPro PPM Express can help.

How to build project portfolio visibility

[FluentPro PPM Express](#) is project portfolio management software, integrating all agile and modern project management tools across Microsoft Project Online, Microsoft Project for the Web, Azure DevOps Boards, Jira Software, Microsoft Planner, Smartsheet, Monday.com, and Microsoft 365 into a single view and enabling hybrid project management approach.

This solution helps with:

Consolidated view dashboard. Ready to use, fully automated connectors, zero migration required.

Plan, prioritize, orchestrate & monitor. Manage ideation, resources allocation; plan, prioritize, and manage project portfolios; visualize strategy and monitor execution with roadmaps.

Advanced reporting and analytics in Power BI. It includes over 200 ready-to-use Power BI reports.

All backlogs and project data are one-click away. You can easily monitor projects, schedules, programs, and backlogs from any project management system.

Protect existing investments. Let your teams use any project management tool that works best for them.

Ready-to-use, no-code and **100% automated** connectors.

Resource management, budgets and **benefits, ideation,** and **innovative management** ready-to-use.

Easy-to-deploy. No migration, no downtime and no massive re-learning for teams needed.

Exceptional Portfolio Control with Increased Productivity

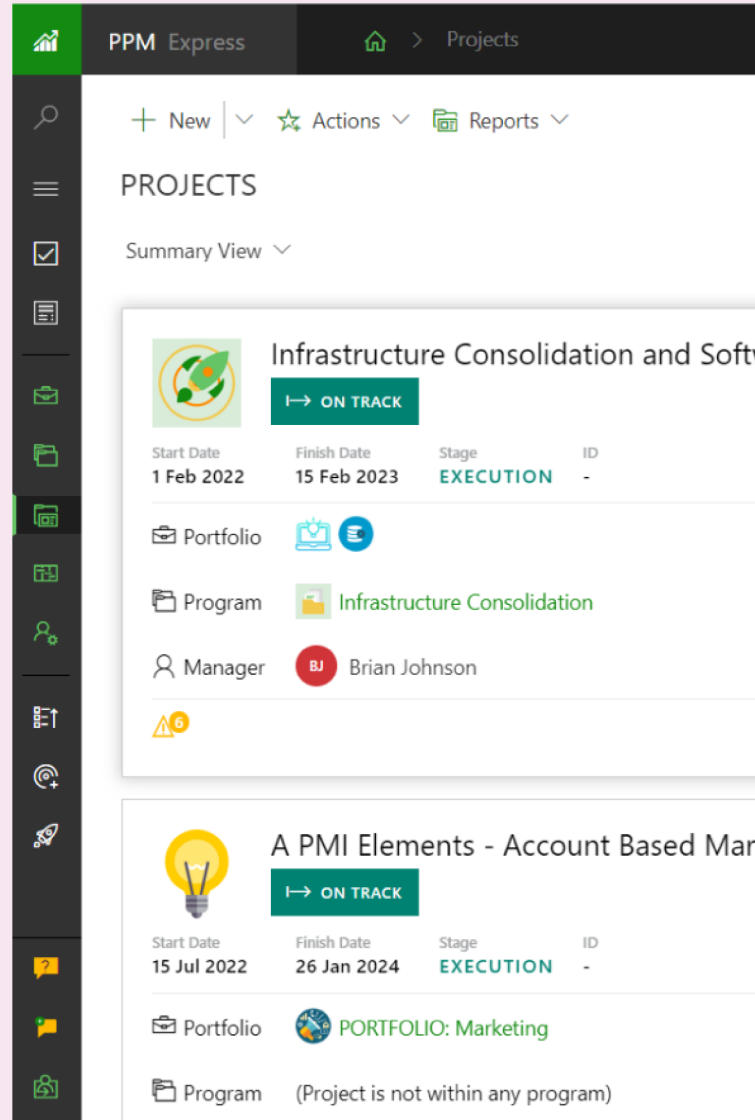

Using PPM Express, organizations can increase teams' productivity and enhance portfolio visibility for PMOs and executives. They can get numerous benefits:

- ✓ **Single platform** to manage “everything” projects. All your project management tools are connected to a single PPM platform.
- ✓ **Enterprise-grade portfolio management** capabilities, out-of-the-box.
- ✓ **No-code integration** platform for multiple project and portfolio management systems.
- ✓ **Extend PPM capabilities.** You can get missing functionalities by connecting systems.
- ✓ **Keep your project management platforms** by integrating them. Teams can continue using what works best for them.
- ✓ **Consolidated reporting.** PMOs and executives can get one view of all projects and portfolios.
- ✓ **Effective resource planning** and utilization.
- ✓ **Manage budgets** and benefits for projects, programs, and portfolios.
- ✓ **Save up to 50+ hours** of PM's time with PPM insights productivity AI.
- ✓ **Over 200+ pre-built reports** in Microsoft Power BI for all PPM areas.
- ✓ **Reliable security.** Runs on Microsoft Azure, Microsoft 365 SSO, and Azure AD Integration.
